

Compliance Capabilities

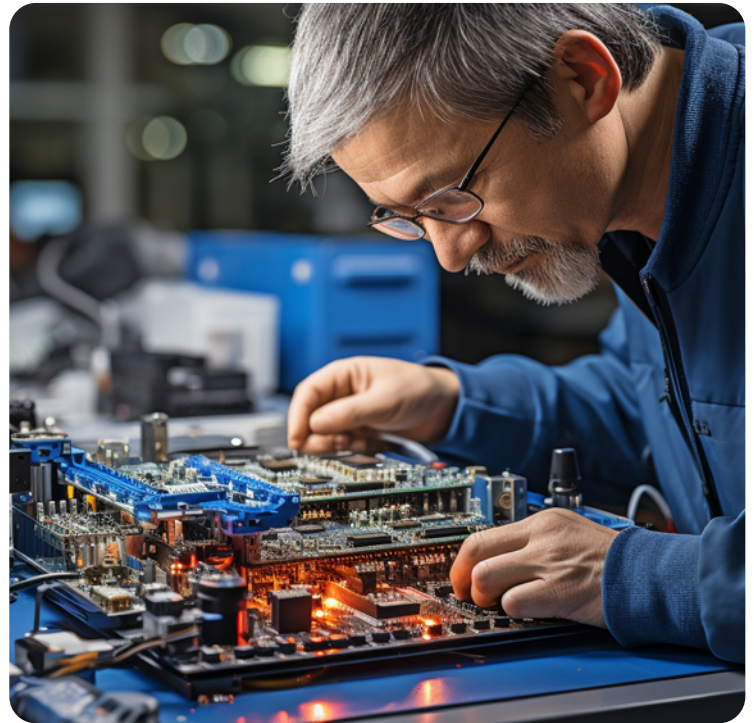

With over 28 years of regulatory compliance experience, Dedicated Computing provides deep expertise, structured support, and consistent execution across complex global compliance programs. We help ensure your products meet all safety, electromagnetic compatibility (EMC), and environmental requirements—efficiently and reliably.

Our standard certification suite, included with all standard product offerings, enables market access across the United States, Canada, the United Kingdom, and the European Union.

Beyond this baseline, we support global market access by managing country-specific compliance requirements in regions such as China, India, Taiwan, South Korea, and more. We also provide test data, guidance, and hands-on support to help customers meet industry-specific standards, including medical compliance (IEC 60601, IEC 61326). Dedicated Computing manages the full certification lifecycle, including initial approvals, updates, renewals, and ongoing compliance maintenance—ensuring your products remain aligned with evolving regulatory requirements. We also stay ahead of emerging regulations and directives, proactively managing compliance data for:

- RoHS (including upcoming changes)
- REACH
- EU Battery Directive
- California Proposition 65
- Conflict Minerals
- PFAS and other emerging regulations

If you have specific compliance requirements or questions, our team is ready to help you navigate the complexity and accelerate your path to market.

"We understand that time-to-market and access to expanding markets are key drivers for your success."

Standard Product Certifications

Dedicated Computing systems are designed with a global compliance baseline, including:

- UL (Safety)
- FCC (EMC – United States)
- CE (European Union)
- UKCA (United Kingdom)
- RoHS (Hazardous Substances)
- REACH (Chemical Compliance)

Global Market Access Certifications

Dedicated Computing can support certification for additional regional requirements, including:

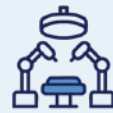

- CCC (China)
- BIS (United States – export controls)
- KC (South Korea)
- BSMI (Taiwan)
- IRAM (Argentina)
- SII (Singapore / Japan, depending on application)
- And others as required

Industry-Specific Certifications

Industrial/Automation

- IEC 62368-1 – Safety for IT and AV equipment
- IEC 61010-1 – Industrial and laboratory equipment safety
- EN 55032 / EN 55035 – EMC

Medical

- IEC 60601 Readiness
 - IEC 60601-1 – Medical electrical safety reports
 - IEC 60601-1-2 – EMC for medical devices testing

Defense/Aerospace

- MIL-STD-810 – Environmental ruggedization capabilities (based on usage case)
- MIL-STD-461 – EMI/EMC for military systems testing
